

safety & security instruction

Deploy standard as well as customized courseware,  
Deliver the most flexible and scalable online learning  
management system... Today

## Partner with Us for Training Development and Deployment

SSi, Inc. (Safety & Security Instruction) is leading computer-based safety and security regulatory training for the aviation industry. By delivering flexible training solutions for every size workforce, SSi meets the unique needs and budgets of increasingly more clients every year.

## Promote Small Business Goals

SSi, is a National Women Business Owner Corporation (NWBOC) certified women-owned small business enterprise (WOSB) organized as an S-Corporation and certified as a DBE in Arizona and Florida. As active members of Airports Council International (ACI-NA) World Business Partner (WBP), ACI World Security Standing Committee (WSSC), American Association of Port Authorities (AAPA), American Association of Airport Executives (AAAE), Florida Airports Council (FAC), Airports Consultants Council (ACC), and other state and national aviation organizations staff are well connected to key industry influences.

## Qualified Professional Interactive Instructional Design Team

Regardless of the level of complexity, SSi develops engaging courseware and training applications uniquely designed for today's working environment where time is a commodity and attention spans are shorter. Our team develops and delivers state-of-the-art, cost-effective, interactive computer-based training (CBT) system, that meets and exceeds compliance requirements across the country and is customized to the needs of our clients and to the specific learning objectives for the end users.

Our project team includes expertise from airports, airlines, and public safety, that maintain close relationships with the Department of Homeland Security (DHS), Transportation Security Administration (TSA), Federal Aviation Administration (FAA), and the International Civil Aviation Organization (ICAO). Through the sharing of subject-matter expertise and regulatory best practices, we ensure our products meet the latest regulatory compliance standards.

SSi has developed one of the most extensive catalogs of standard interactive courseware available to airports. Topics include aircraft rescue and firefighting (ARFF), security awareness procedures, driver training, fueling, safety and communications, and general aviation courseware designed to operate on all browsers and from any computer or mobile device.

**Delivering exceptional customer service**  
**Responding to client's unique specifications**  
**Creating hi-tech products for changing operations**

## interactive Learning System (iLS™) Overview

Today airports and other clients across the country benefit by utilizing the recordkeeping features of the interactive Learning System (iLS™) to deliver compliance training. For more than a decade, SSi has delivered eLearning to clients across the country, with over 1 million training events monthly.

Systems are deployed with built-in configuration options for flexibility to meet the constantly changing demands of industry. Functionality includes the ability to automatically assign recurrent training, send e-mail notifications, and track traditional classroom or OJT “blended learning.”

The iLS™ uses open architecture. It can track nearly any standard learning objective-based course, even if it is not created by SSi. Third-party created modules created by your staff using other popular course authoring tools can be tracked with iLS™ recordkeeping.

## Deployment Options

**On-Premise, behind your firewall**

**Cloud-hosted SaaS**

A physical or virtualized server environment deployment. Annual cost is reduced while an initial investment for deployment and end-user software license is included in the first year costs. The Client will be provided with suggestive backup routines upon contracting. SSi provides 24/7/365 access to the online knowledgebase and technical support.

The iLS™ resides on the SSi secured cloud virtualized servers. The initial investment for deployment includes the Software as a Service (SaaS) fee. The SaaS subscription includes hosting sufficient bandwidth for media-rich courses, nightly back-ups, server security upgrades and maintenance during the agreement.

## US Communities: Simplified Procurement, Faster Innovation

Access Unicom Government, Inc. (UGI) and the US Communities government contract to streamline training program deployment, systems quickly, efficiently. UGI and SSi ensure the features and scope of services most valuable to your organization are delivered. There's no guessing what a committee might procure for you. Contract management support and program oversight by UGI can be beneficial in shortening installation timelines and ensuring proper contract closeouts meet your scheduling and budgetary constraints.

Take advantage of SSi's capabilities as a qualified WOSB and use the quicker procurement vehicles of our partner UGI.

The U.S. Communities Government Purchasing Alliance helps reduce time and resources by providing access to pre-competed bids and awarded contracts to agencies nationally. This government purchasing cooperative provides world-class procurement resources and solutions to state and local government agencies.
